## Heated Forceps/Tweezers

These Premier Heated Forceps are designed for paraffin embedding to reduce the “carry-over” often associated with ordinary forceps. The system has been designed with dual outlet control box to accept two pairs of forceps with a choice of tip sizes of 1mm, 2mm and 4mm. The tip temperature remains constant and is supplied from a safe 12v power supply.

- F318** Dual outlet control box with transformer
- F320** Forceps 15cm x 1mm tip (red)
- F321** Forceps 15cm x 4mm tip (blue)
- F322** Forceps 15cm x 2mm tip (yellow)

## Slide Dryer and Hybridisation Hotplate

Two units with black non-reflecting surfaces for excellent section visualisation, variable temperature control, uniform surface temperature, accuracy  $\pm 1^{\circ}\text{C}$  with digital display.

- H069** Slide dryer 150 x 555 x 75mm 220/240v 50-60Hz, 110v/A, range room temperature to  $85^{\circ}\text{C}$ , weight 4Kg
- H070** Hybridisation unit dimensions, power supply, weight as above, range room temperature to  $100^{\circ}\text{C}$ .
