

| <u>Number</u> | <u>Description</u>               | <u>Number</u> | <u>Description</u>                  |
|---------------|----------------------------------|---------------|-------------------------------------|
| 1             | Glutaraldehyde                   | 39            | Ultrasonic cleaners and chemicals   |
| 2             | Osmium tetroxide                 | 40            | Pronase P020                        |
| 3             | TAAB Embedding Resin             | 41            | Polyester wax                       |
| 4             | Premix resin kits                | 42            | Eukitt® mounting medium             |
| 5             | Lowicryl kits                    | 43            | Acetonitrile                        |
| 6             | TAAB Quetol 523                  | 44            | EM magnification calibration        |
| 7             | Spurr's resin                    | 45            | Lattice plane resolution tests P138 |
| 8             | Electrodag 915                   | 46            | Araldite 502 kit                    |
| 9             | Epoxy resin Araldite CY 212      | 47            | Grid stick kit                      |
| 10            | Ultra low viscosity resin        | 48            | Silver epoxy adhesive               |
| 11            | HEMA (hydroxyethyl methacrylate) | 49            | Phosphate buffers                   |
| 12            | TAAB 812 resin                   | 50            | Clear casting resin C               |
| 13            | Silver Proteinate                | 51            | RBS 25 & 50 surfactants             |
| 14            | Butvar B98                       | 52            | Calibration specimens for SEM       |
| 15            | Grid storage box                 | 53            | <i>Kent 3 lapping machine</i>       |
| 16            | TAAB embedding oven              | 54            | Diamond slitting saw                |
| 17            | Photomicrograph scale marker     | 55            | High speed slitting saw             |
| 18            | Ultrastructure scale marker      | 56            | Precision disc grinder              |
| 19            | Ester wax                        | 57            | Unicoat                             |
| 20            | TAAB transmit resin              | 58            | Betadet 99                          |
| 21            | TAAB superglass                  | 59            | Betadet powder                      |
| 22            | LR white resin                   | 60            | Betadet 101                         |
| 23            | TAAB rotators                    | 62            | Diamond knife care and use          |
| 24            | Spark erosion machine            | 63            | Beta-sorb                           |
| 25            | Resin immunocytochemistry        | 64            | Vestopal W embedding kit            |
| 26            | Cryometer                        | 65            | Dry lettering sheets                |
| 27            | TAAB demagnetiser                | 66            | Tempfix mounting adhesive           |
| 28            | Gold conjugates, EM, LM blotting | 67            | Leit-C (conducting carbon cement)   |
| 29            | Embedding moulds                 | 68            | Vacuum tweezer - pads and probes    |
| 30            | TAAB capsules                    | 69            | immuno-Bed kit                      |
| 31            | TAAB knifemaker Mk2              | 70            | P47 Phosphor powder                 |
| 32            | TAAB histoknifemaker             | 71            | Rapido line ortho film P088         |
| 33            | LR gold resin                    | 72            | Lattice plane resolution tests      |
| 34            | Histocryl resin                  | 73            | TAAB resolve resin cleaner          |
| 35            | Melamine resin kit               | 74            | Carbon adhesive sheets              |
| 36            | JB4 resin kit                    | 75            | Lacomit lacquer                     |
| 37            | Methacrylate embedding kit       | 76            | Beginners guide - choosing a resin  |
| 38            | Durcupan water soluble resin kit | 77            | TAAB resins for microscopy          |

| <u>Number</u> | <u>Description</u>                    |
|---------------|---------------------------------------|
| 78            | TAAB Emix resin kit                   |
| 79            | TAAB Lemix embedding resin            |
| 80            | SLEEK tape for UM boats               |
| 81            | Bone saw                              |
| 82            | Tooth saw                             |
| 83            | Horse radish peroxidase tablets       |
| 84            | Cargille™ meltmounts                  |
| 85            | UltraClear clearing agent             |
| 86            | Hexamethyldisilazane (HMDS)           |
| 87            | 1% Formvar in chloroform              |
| 88            | Wetting agent for diamond knives W101 |
| 89            | Glutaraldehyde/Carbohydrazide (GACH)  |
| 90            | Transparency storage                  |
| 91            | Ruthenium tetroxide 0.5% solution     |
| 92            | Multi immuno staining system          |
| 93            | Grid coating pen P293                 |
| 94            | Quetol 651 embedding procedure        |
| 95            | Hydroxypropyl methacrylate            |
