

Inspection Mirrors

Completely insulated dental type mirrors. A one-piece steel handle is securely fixed to the shell and both are covered with a continuous thick layer of synthetic compound. Diameter of mirror 20mm. Length 165mm.

- | | | |
|-------------|---|------|
| M050 | Inspection mirror, plane | each |
| M051 | Inspection mirror, concave (magnifying) | each |

Inspection Mirrors - Swivel

A well designed ball and socket joint allows a standard mirror and stem to be moved in many directions at the end of a 228mm tubular handle. Diameter of mirror 20mm. Length 254mm.

- | | | |
|-------------|---|------|
| M364 | Inspection mirror, swivel, plane | each |
| M365 | Inspection mirror, swivel, concave (magnifying) | each |

Allen Keys - Set

Socket screw wrenches in holder. Two sets are available, Metric 1.5mm to 6mm, Imperial $\frac{1}{16}$ to $\frac{1}{4}$ inch

- | | | |
|-------------|--------------------------------|------|
| A050 | Allen keys, metric, set of 6 | each |
| A051 | Allen keys, imperial, set of 8 | each |

Allen Keys - Loose

To replace lost, worn, twisted, broken or borrowed keys, there is available a range of individual keys in both imperial and metric sizes. The keys are top quality, key hardened and tempered in standard length series.

Sold in units of one key

- | | | | |
|---------------|-----------------|---------------|-------------------------------|
| A073 | Allen key 1.5mm | A074 | Allen key $\frac{1}{16}$ inch |
| A073/1 | Allen key 2.0mm | A074/1 | Allen key $\frac{5}{64}$ inch |
| A073/2 | Allen key 2.5mm | A074/2 | Allen key $\frac{3}{32}$ inch |
| A073/3 | Allen key 3.0mm | A074/3 | Allen key $\frac{1}{8}$ inch |
| A073/4 | Allen key 4.0mm | A074/4 | Allen key $\frac{5}{32}$ inch |
| A073/5 | Allen key 5.0mm | A074/5 | Allen key $\frac{3}{16}$ inch |
| A073/6 | Allen key 6.0mm | A074/6 | Allen key $\frac{7}{32}$ inch |
| | | A074/7 | Allen key $\frac{1}{4}$ inch |

Vernier Callipers

The finest of vernier callipers, stainless steel satin chrome finish, hardened throughout. This vernier calliper is perfect for inside, outside and depth measurement, with micro adjustment for ultimate accuracy. Vernier scale 0.001inch x 0.02mm.

- | | | |
|-----------------|--------------------------------|------|
| V053/150 | Vernier callipers, 6inch/150mm | each |
| V053/200 | Vernier callipers, 8inch/200mm | each |

Vernier Callipers - Digimatic

This vernier calliper combines the highest quality with the latest 'state-of-the-art' electronics. Outside, inside, depth and step measurements are read rapidly from the high contrast LCD display in either imperial or metric with resolution to 0.0005inch or 0.01mm.

Instant inch/mm conversion: zero point at any position

Power off switch

Automatic wear compensation: Positive locking clamp

V068/150 Vernier calliper – digimatic, 6inch/150mm each

Micrometer - Digimatic

A lightweight electronic-micrometer with one-handed operation of the traditional micrometer linked to the advantaged of today's electronics. It has a resolution of 0.001mm or 0.0005inch and operates for about 2 years from a single silver oxide cell.

Large bright clear LCD digital display: Instant inch/mm conversion

Measurement hold key: Zero set in any position

Flatness 0.3% μ m/Parallelism 1% μ m

Power off switch

Ratchet type barrel operation

M134 Micrometer - digimatic, 0 - 1inch/0 - 25mm each

Micrometer

An economy high quality micrometer with enamelled frame of nodular cast iron. This micrometer is a precision instrument with a reading of 0.001inch or 0.01mm and is deal for general or student use.

Ratchet type barrel operation

Tungsten carbide anvils

M135 Micrometer, imperial, 0 - 1inch each

M136 Micrometer, metric, 0 - 25mm each

Steel Rules

Precision, rustless steel rules – two sides – four edges. Subdivided inches in 16ths, 32nds, 64ths, 10ths, 20ths, 50ths, 100ths one side. Mm, $\frac{1}{2}$ mm figured every 10mm in mm other side. One round end.

Available in two sizes: Length 6inch/150mm width 12.5mm – flexible

Length 12inch/300mm width 25mm

R074 Steel rule - 150mm (6inch) flexible each

R075 Steel rule - 300mm (12inch) each

Pen Light - Disposable

A small lightweight pen light which clips onto a pocket. It is useful for illuminating small inaccessible areas of instruments. Pressing the clip switch activates the light.

The pen light should be discarded when the battery runs out.

P403 Pen light – disposable per 6
