

TAAB Embedding Capsules

TAAB manufactures an extensive range of high quality, low cost embedding capsules with airtight snap-on integral caps. These capsules are available in 8mm and 6mm diameter, **polyethylene** (soft) for low temperature curing up to 75°C, or **polypropylene** (hard) for high temperature curing up to 100°C, which can also be autoclaved. Three tip designs to choose from to produce 8mm diameter blocks with **truncated cone** that ends in a 1.4mm diameter flat, a **truncated pyramid** having a 1mm square end and a **full flat ended** block and 6mm diameter blocks with truncated **cone** that also end in a 1.4mm diameter flat.

C050	TAAB capsule 8mm truncated cone, polyethylene	500
C051	TAAB capsule 8mm truncated cone, <i>polypropylene</i>	500
C052	TAAB capsule 6mm truncated cone, polyethylene	500
C053	TAAB capsule 6mm truncated cone, <i>polypropylene</i>	500
C063	TAAB capsule 8mm truncated pyramid, polyethylene	500
C064	TAAB capsule 8mm truncated pyramid, <i>polypropylene</i>	500
C094	TAAB capsule 8mm flat, polyethylene	500

The flat-ended capsules C094 and C095 are also ideal for storage of specimens and grids.

TAAB Capsule Rack

Aluminium pre-numbered rack accommodating 25 TAAB capsules. Designed to permit the TAAB capsule to rest safely on its square flange so preventing the capsule from passing through the holes. This design of rack is not suitable for other types of embedding capsules. The racks are self stacking and suitable for temperatures well in excess of 100°C.

C054	TAAB capsule rack – 8mm capsule	per 5
C055	TAAB capsule rack – 6mm capsule	per 5

TAAB Capsule Splitter

Used with a single edge blade to give easy and safe removal of blocks from TAAB capsules, accepts both 8mm and 6mm size capsules. Particularly useful with the harder polypropylene capsules.

C065	TAAB capsule splitter	each
-------------	-----------------------	------

BEEM Capsules

Available in two shapes, these Polythene capsules have either a truncated pyramid shape ending in a 1mm square tip in 8mm (00) or 5.2mm (3) diameter or with a Bottle-neck (Hemi-hyperbola) tip (rather than the faced tip). Useful for embedding very small or elongated specimens, this shape is only available in the 8mm (00) size.

C056	BEEM 8mm diam. truncated pyramid	100
C056/1	BEEM 8mm diam. truncated pyramid	1000
C057	BEEM 5.2mm diam. truncated pyramid	100
C057/1	BEEM 5.2mm diam. truncated pyramid	1000
C266	BEEM 8mm diam. bottle-neck	100

C266

Gelatine Capsules

Larger gelatine capsules are available on request - please contact our sales team.

Manufactured from hard colourless gelatine, these capsules are ideal to mould blocks for sectioning, or can be used for grid and specimen storage and transit.

Product code	Capsule size	Diameter mm	Volume ml	Quantity approx.
C086	000	9.50	1.37	100
C086/1	000	9.50	1.37	1000
C087	00	8.50	0.95	100
C087/1	00	8.50	0.95	1000

C092/1	4	5.00	0.21	1000

Micromoulds

A self supporting polyethylene strips of 10 numbered embedding moulds, each mould produces 8mm diameter (size 00) blocks with a truncated pyramid having a 1mm square end. The mould is open ended with no closure.

C208 Micromoulds 8mm

pack 10 strips

Microporous Specimen Capsules

These solvent resistant small porous capsules with push-on lids can be used for many processing applications for fragile specimens. The microporous structure allows liquid exchange but the walls retain sufficient reagent to keep specimens moist up to the dehydration stage. The capsules are extremely useful for safely containing biological specimens during processing for Critical Point Drying. Also useful for specimen desiccation procedures. Average pore size 80µm

Internal dimensions: 8mm Ø x 7mm high (with lid fitted)

External dimensions: 10mm Ø x 12mm high (with lid fitted)

C255 Microporous specimen processing capsules with lids pack 10

Leica/LKB Embedding Capsules 'Easy Moulds'

Polyethylene "easy moulds" available in two sizes 5.6mm and 8mm, the tip of each mould is 0.3mm thick and is designed to act as a "window" to orient the specimen before polymerisation. The design of the mould tray allows air to circulate freely around the specimen tip during curing. The mould can be capped when using methacrylates etc by placing another mould on top, and with light pressure seal the capsules completely. The cured blocks will pop out by simply compressing the tip of the mould with your thumb. Each tray has 20 moulds that are numbered for easy reference.

C250 Leica/LKB embedding capsule 5.6mm

50 trays

C251 Leica/LKB embedding capsule 8.0mm

50 trays

Technovit Specimen Mould

A Polythene mould with removable top and bottom and specimen chamber size of 22mm L x 12mm W x 9mm Deep. V shaped at both ends so it can be used for more than one specimen from the same batch. Outside diameter of final cylinder for clamping in the microtome is 25mm.

T276 Technovit mould pack of 3

BEEM Capsule Holder

Specially designed vacuum formed plastic trays to hold 22 capsules. Trays are easily stacked in the TAAB Embedding Oven for polymerisation of resins. Although originally designed to take BEEM capsules, the 8mm tray will accept TAAB Capsules and size 00 gelatine capsules and the 5.2mm tray also accepts size 3 gelatine capsules. The trays are used to hold capsules upright during the resin embedding stage and the small hole in the bottom of each tray cavity allows for illumination from the bottom to assist specimen orientation.

C066 BEEM capsule tray for 8mm capsules each
 C067 BEEM capsule tray for 5.2mm capsule each

BEEM Capsule Press

A hand operated press for releasing blocks from BEEM capsules. The block is pushed out safely without any resultant damage, there is an adapter available to convert the press to accept 5.2mm (No. 3) size capsules.

C213 BEEM capsule press 1
 C213A Press adapter for No. 3 capsules 1

Blades – Single Edge

GEM extra keen single edge, rigid backed blades 0.009" thick, ideal for sectioning, trimming etc. These blades are available in carbon or stainless steel packed 100 blades in a drawer box or as 10's in a plastic bag.

B054 Single edge grade 2 uncoated carbon steel blades 100
 B055 Single edge grade 2 uncoated carbon steel blades 1000
 B056 Single edge grade 1 uncoated stainless steel blades 100
 B056/2 Single edge grade 1 uncoated stainless steel blades 10

Also available is a **Teflon** coated Grade 2 Blade

B301 Single edge grade 2 Teflon coated carbon steel blade 100

Blades - Heavy Duty

For those wishing for a more rigid, stronger blade there is a version similar to the B054 which is 0.012" thick and without the end notches giving added strength and rigidity to an already strong and highly acclaimed superior cutting edge.

B146 Single edge heavy duty grade 2 carbon steel blades 100

Blades – Double Edge

Double edge stainless steel 0.004" blades.

B253 Double edge stainless steel blades 100
 B253/1 Double edge stainless steel blades 10 x 10

Blades – GEM in

Carbon Steel, 0.009" thick single edge blades packed 10 to a dispenser. The used blades are stored in the bottom of the rigid dispenser for safe disposal.

B147	Single edge blades in dispenser	each
B147/1	Single edge blades in dispenser	pack/12

Blades - Unbacked

B336/1

Rigid carbon steel unbacked blades ,one **B336/1** has no holes or notches the other **B335** is similar to B054 but without backing.

The **B335** product is supplied in a protective/dispenser container, this is reflected in the product price, after the one-off cost the empty container can be returned for a refill when ordering **B335/RF** or you can refill the dispenser yourself from the 1000 pack.

B335/1	Single edge blade <i>without</i> backing	1000
B335	Single edge blade w/o backing in dispenser	100
B335/RF	Single edge blade w/o backing, refill	100
B336/1	S/edge blade <i>without</i> notches and backing	1000

B335

Blades – Injector Style

Stainless steel single edge blades, ideal for Vibratome and other sectioning applications. Blade length 1.5 inch (38mm), width ¼ inch (6mm) and thickness 0.050 inch (0.12mm). The **B294** product is supplied in a protective/dispenser container. This is returnable and reflected in the initial product price. After the one-off cost, the empty container can be returned for a refill when ordering **B294/RF**.

B294	Blades – injector style stainless steel	100
B294/RF	Blades - injector s/steel refill	100
B294/1	Blades – injector style stainless steel	1000
B210	Blades - injector style <i>platinum</i> coated	100

HOLDER for Single Edge Blades

This holder will take any of the B054, B055 or B056 blades. The blade is retractable when not in use and provides a safer method of use, keeping fingers further away from the cutting edge when cutting hard materials.

Comes complete with one blade, it is easy to reverse blade to expose a new cutting edge or to refill with a new blade.

B181	Holder for single edge blade	each
-------------	------------------------------	------

Glass Microspray

Designed to atomise very small volumes of liquid, the spray is valuable in preparing virus and protein suspensions and a wide variety of other particle preparations. The spray is made in glass to facilitate thorough washing and autoclaving. It will operate with as little as 0.2ml of suspension. It normally directs the suspension onto grids lying on a horizontal surface, through a right angled exit tube. A screw joint to the extension permits alternative attachment to a closed vessel for extra protection during dangerous preparations. The blowball attached to the air inlet is valved so that there is no sucking back of vapour from the spray. Spray droplets down to μm are formed.

- | | | |
|-------------|--|----------|
| M073 | Glass microspray, complete | each |
| | spare parts may be purchased separately | |
| M074 | Glass spray with bung | each |
| M075 | 2-Way valved PVC blowball | each |
| M076 | PTFE gasket, screwed union and tube with 90° bend for attachment to M074 | set |
| M077 | Spare bungs for spray | pack/ 10 |

BEEM Block Holder Module

A small moulded box with clear plastic snap-fit cover. This box holds up to ten size 00 (8mm) blocks in numbered compartments.

- | | | |
|---------------|--------------------------|--------|
| B103 | BEEM block holder module | each |
| B103/1 | BEEM block holder module | per 10 |

Microtome Chuck - Flat Embedding Mould

A useful flat embedding chuck suitable for all Reichert and RMC ultramicrotomes. Careful design allows total adjustment of jaws to cope with varying thicknesses of resin blocks.

- | | | |
|-------------|---|------|
| S264 | Microtome chuck - flat embedding mould | each |
| | <i>Also available for LKB please ask.</i> | |

BEEM Flat Embedding Mould

A virtually transparent polyethylene mould, each cavity is numbered and each unit can produce up to 12 smooth flat polished blocks, size 12mm x 5mm x 3mm deep. The transparent nature of the mould facilitates specimen orientation with bottom illumination. Supplied in a plastic box with hinged lid.

- | | | |
|---------------|---------------------------|--------|
| E107 | BEEM flat embedding mould | each |
| E107/1 | BEEM flat embedding mould | per 10 |

Silicone Moulds

A range of moulds that give an alternative method of embedding to TAAB or BEEM capsules. Re-usable, ease of block removal, easy to stack, ten numbered impressions are just a few of the obvious advantages. Along with other silicone moulds, these moulds are not recommended for use with some resins and methacrylates. In these and other circumstances – we suggest the use of TAAB's full range of polyethylene and polypropylene capsules.

This range of moulds produce the classical style of blocks in 8mm diameter. TAAB have extended the range to include a flat version with the length of block produced reduced to 9mm long.

- | | | |
|--------------|--|------|
| E076 | TAAB silicone mould, truncated cone | each |
| E077 | TAAB silicone mould, truncated pyramid | each |
| E078 | TAAB silicone mould, flat | each |
| E078X | TAAB silicone mould, flat x 9mm long | each |

Embedding Moulds and Stubs

An embedding system producing ready mounted blocks in a choice of **four sizes** for direct mounting to microtomes. The rigid plastic stubs bond to all resins and can be clamped in the microtome on a choice of two diameters, 25mm or 10mm. These stubs are inexpensive, can be written on for reference and are intended to be used as a disposable item. The E092 range of stubs has a deeper 25mm diameter flange to provide more secure clamping in the microtome. The stubs are available in a range of colours for coding of specimens. The polyethylene moulds are individual items which nest in stackable aluminium trays embedding trays each holding up to 6 moulds, which can be any one of the four available mould types 16 x 8 x 5mm deep; 12 x 8 x 5mm deep; 19 x 13 x 5mm deep and 16 x 2 x 5mm deep.

The aluminium trays are durable and with reasonable care will last for years. The moulds may be re-used several times.

Histological Embedding Moulds

With the routine use of resin embedding in the histological field, there is a demand for convenient moulds to accommodate larger sections. The **four** green silicone rubber moulds each accommodate four referenced blocks, the base in each case being 25 x 25mm. The area containing the material to be sectioned comes in **four** sizes, 10 x 10mm; 10 x 15mm; 10 x 20mm and 10 x 25mm.

E065	Histological mould 10 x 10mm	each
E066	Histological mould 10 x 15mm	each

E068	Histological mould 10 x 25mm	each

Technovit Teflon Histoform Embedding Moulds

T393 Histoform S A Teflon mould giving easy removal of **10** plastic blocks using the Histobloc system. Backed by a heavy steel plate to act as a heat sink and ensure lower curing temperatures within the block. This is particularly pertinent to immunocytochemical work.

Mould cavities 10mm wide x 16mm high x 6.5mm deep

T394 Histoform Q As Histoform S but with *mould cavities* 20mm wide x 16mm high x 10mm deep.

T405 Histoform N As above but with *mould cavities* 10mm W x 18mm H x 10mm D.

Histoform S

Histoform Q

Histoform N

Histobloc

Histobloc An easily fixed and permanent backing for Histoform specimens that can be clamped into all rotary microtomes without an adapter. Easy to write on and they link together for storage.

T395 Histobloc mounting blocks for S and Q pack of 100 **T395/N** Histobloc for Histoform N
