Iford Multigrade 3 RC Deluxe

This system offers variable contrast paper with 'whiter' whites and 'blackier' blacks. The system offers high print quality and a full contrast range from a single paper. There is an impressive eleven distinct contrast grades spaced in half grade steps from 0 to 5 is achieved by the selection of filters. For a grade 3 contrast filter no. 3 is selected, no. 4 filter for contrast 4 etc.

With eight of the eleven filters the paper has exactly the same effective speed which means that exposure times do not differ. The three grades that do differ are 4, 4½ and 5 and all that is required is to double the exposure time or open the aperture one stop.
