## Slide Staining Racks

**S260 Stainless steel** staining rack carries 60 slides horizontally

**S259 Stainless steel** staining rack carries 60 slides vertically

**Plastic (Polyacetal) Staining Rack** (resistant to xylene and alcohol)

The rack carries 25 slides 76 x 26mm horizontally and is fitted with a swing handle. The trough is fitted with a light-proof lid and can be used for staining, storage and carriage. A polystyrene storage box accommodating four of the staining racks is available.

**S275** Plastic staining rack each

**S276** Staining Trough each

**S277** Storage box for 4 staining racks each

## Coverslip Staining Racks

Stainless steel racks with grooves to hold either 25 or 6 coverslips vertically. Please add suffix **/S** for rack to hold 6 coverslips.

**S298** Staining rack for 12mm coverslips

**S391** Staining rack for 13mm coverslips

**S392** Staining rack for 18mm coverslips

**S393** Staining rack for 24mm coverslips

**S394** Staining rack for 26mm coverslips

**S395** Staining rack for 30mm coverslips

## Coplin Staining Jars

### Glass

A heavy duty staining jar with a drop-on glass lid for slide staining or use as a solvent chamber. Holds **5** single 76 x 26mm slides vertically or **10** slides back-to-back. Volume approx. 30ml.

**J051** Coplin staining jar glass pack of 10 **J051/1** Coplin jar glass each

### Polythene

A tough moulded Polythene staining jar with a screw-on lid with the same capacities as J051. It can also be useful for slide transit

**J052** Coplin staining jar Polythene each **J052/1** Coplin jar Polythene pack of 10

## Hellendahl-Vertical Staining Jar

An **all glass** rectangular staining jar which accommodates 16 slides 76 x 26mm vertically back-to-back and comes with a drop-on glass lid. The wide top eliminates the need to handle the slides with forceps. Volume 80ml.

**J054** Hellendahl jar each

**J054/1** Hellendahl jar pack of 10

## Schieferdecker-Horizontal Staining Jar

An **all glass** rectangular staining jar with drop-on glass lid to accept 10 76 x 26mm microscope slides horizontally, volume 100ml

**J053** Schieferdecker jar each

**J053/1** Schieferdecker jar pack of 10

## Glass Staining Block

A solid glass block with polished 6mm deep semi-circular cavity and flat glass cover. Useful for viewing or staining free-floating specimens.

**S166** Staining block 40mm x 40mm each

## Glass Staining Trough and Slide Carrier

Glass staining trough 83mm x 103mm x 70mm high with smooth sides and drop-on glass lid. Accepts one glass slide carrier holding 20 slides 76 x 26mm back-to-back

**S337** Staining trough each

**S338** Glass slide carrier each

## Staining Bath and Racks for 50 Slides

A glass staining bath with the capacity to take 50 glass microscope slides in 10 slide holders each holder carrying 5 slides. The slides can remain in the holder even during microscopic examination if required.

**S404** Staining bath and slide holders for 50 slides

## Columbia Jar for Coverslip Staining

Glass staining jar with grooves to take 22mm square coverslips vertically, 4 individually or 8 back to back. Black plastic lid with foil lined cork backing. Low volume (8ml) makes it ideal for use with costly reagents.

**J055** Columbia coverglass staining jar

**J055/1** Columbia jar pack of 10

## Pyrex Glass Dish

A clear, circular, flat bottom dish without spout, 140mm Ø and 75mm deep with a volume of 900ml.

**B244** Circular Pyrex dish each

## Dropper Bottles

A clear glass drop bottle with plastic stopper and glass rod dropper. Ideal for dispensing immersion oil.

**B174** Dropper bottle with glass rod 60ml each

### T.K. Drop Bottle

Dark glass bottle with ground in grooved glass stopper for dispensing small amounts of liquid.

**B175** TK Drop bottle 50ml each
