

## Virusolve + Disinfectant

A complex blend containing the latest dodecylamine based structures, solvents and fully non-toxic, biodegradable detergent. The formulation does not contain any hazardous aldehydes or chlorine generating components. Highly effective as a cleaner and disinfectant against bacteria, mycobacteria, fungi, viruses, spores, MRSA, C.diff. HIV agents, E.Coli and NDM1. Virusolve+ does not simply render the microorganisms inert but has been demonstrated to kill them by disrupting the RNA of the microorganisms and preventing resistance being built up. It is safe to use on any surface and is odourless and colourless.
